

# Resco Explorer 2008

## Skin specification

### Skin Location

All skin files as well as associated images have to be location in:

[Explorer 2008 Folder]\Skins\[SkinName].skn

The created skin will be visible in the **Customize dialog**.

The best way how to create your own skin is to create a copy of the existing Blue.skn, rename it and modify the required fields.

### Color specification:

Colors can be specified in several ways

- #RRGGBB** – rgb color, RR, GG and BB are values written in hexa code 00-FF
- rgb(r-g-b)** – rgb color, where r, g, and b are numeric values 0-255
- ignore** - item will not be filled by any color
- sysColor(i)** - system color defined by actual theme
