technology on the move

Why do over 2,000 corporations and 100,000+ sales & field service reps rely on Resco?

High flexibility in customizations & branding — create custom objects, design dashboards, edit colors or fonts and more

Fast synchronization — choose manual & background sync, auto-sync or delayed schema publishes

**Mobile audit & analytics** — track by whom, when, where and how exactly operations have taken place

True offline, no compromises — work with real-time Salesforce data — even when there is no or slow connectivity

> "
> Everything truly mobile, offline capable, an easy user interface to work with, and quick turnarounds; our staff voted Resco Mobile CRM as the best investment of the year.
> "
>
> — **Primary ITO**

Device security — protect your and your customer's data by more than just user's pin

Offline reports with digital signature — generate a report at each field service/sales visit or an inspection

**Offline maps & route planning** — display any object on a map, create custom pins, map layers and plan daily routes

All platforms, all devices, all licenses — the app runs on iOS, Android, Windows phones & tablets and works with all Salesforce licenses

Multimedia & document management — enrich your Salesforce data with rich media files (PDF, PNG, AVI, MS Word, MS Excel…)

Save costs & your programmer's time — create a tailor-made app with no code for a very reasonable price

> " Resco's mobile app not only brings the full offline capability to Salesforce users and their data. The app is also fully integrated with Salesforce! It allows your sales/field service teams to be in a remote location and still be productive.

Make a difference in the life of a field service or a sales rep

The user experience with Resco Mobile CRM has proven to be a joy and ease to work with. After all, having a completely unified look on all platforms is key.

> "I don't know another approach that's as quick and easy to deploy like Resco Mobile CRM. The speed in which you can personalize the solution, the fact that it's cross-platform right out-of-the-box is great."
>
> — **Boehringer Ingelheim (Merial), France**

Acquiring sound and secure access to CRM data can be a real challenge even in today's modern society.

In Nigeria, Heineken sales reps work in the field with no internet connection, often for several days at a time.

> "We needed to give the sales representatives a tool that would structure and simplify their work. It was critical to provide them with a solution they could use to plan and make their sales calls (visits). At the same time the input data would give the back office important market and performance insights."
>
